

IDEAS

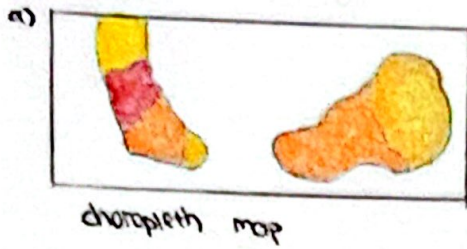

Author: Zoe

Date: 30/9/2023

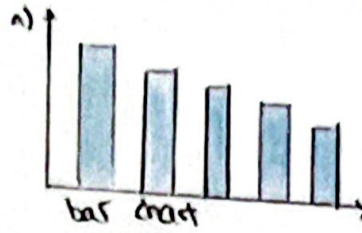

Sheet: 1

Task: Planning Visualisations

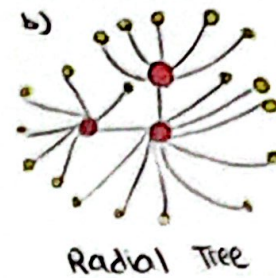

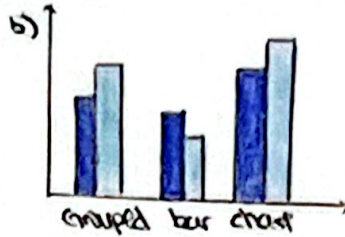

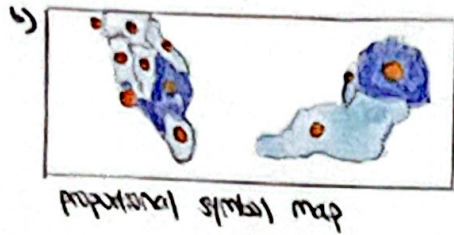

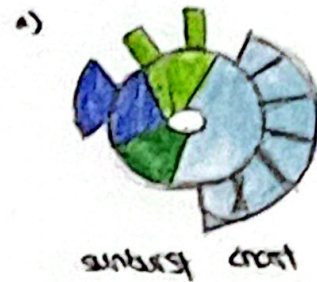

① Spatial Distribution

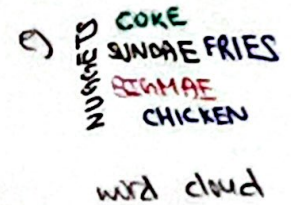

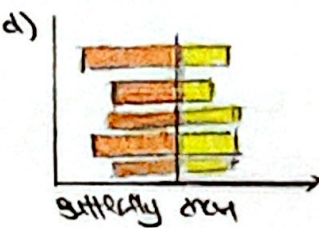

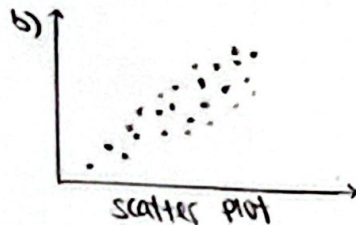

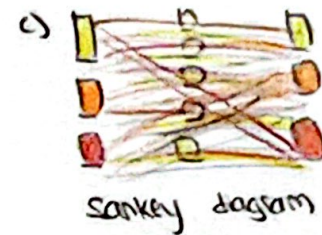

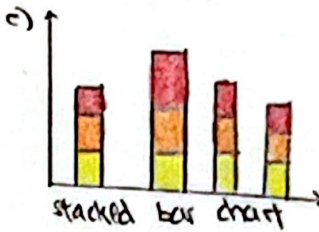

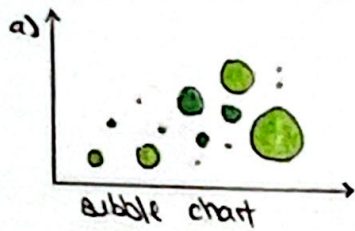

③ comparative analysis

④ Nutritional Facts & Menu Insights

② Socio Economic & Health Relationships

FILTER

① a) choropleth map
→ similar to proportional map, less intuitive for outlet count

③ c) stacked bar chart
→ redundant with the grouped bar chart

④ b) Radial diagram
→ overlaps with sunburst chart, sunburst provides a more hierarchical view

④ c) Sankey diagram
→ interesting but adds unnecessary complexity for menu

CATEGORISE

spatial distribution
1b

comparative analysis
3a, 3b, 3c, 3d

socioeconomic & health relationships
2a

Menu nutrition
4a, 4d, 4e

COMBINE & REFINES

① b forms the spatial backbone of the dashboard

③ b selected over ③ a and ③ c since it allows side by side comparison of multiple variables

③ a chosen over ③ b because it can encode multiple dimensions at once

③ d retained because it offers a distinct way to compare two opposing metrics directly

④ d + ④ e combine into a single nutrition panel

QUESTION

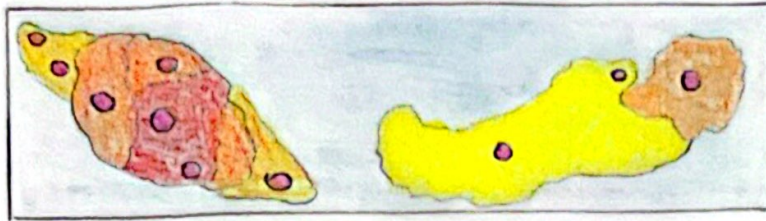

→ can I use Vega to plot sunburst?

→ How to create visual hierarchy with MCD theme colour?

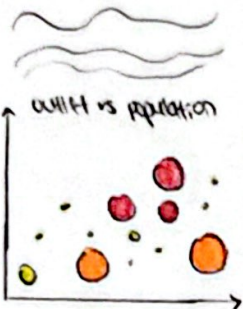

→ Is the visualisation clear and not too messy to interpret?

LAYOUT

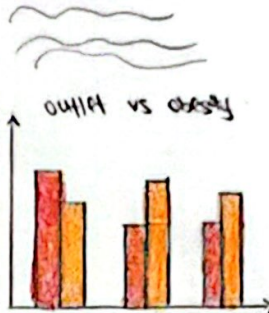

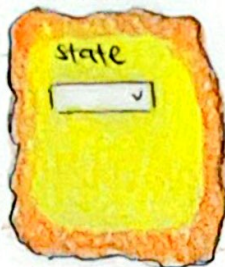

FOODPRINT MALAYSIA

average
median

PAN CAKE

tourism vs outlet

title: story telling 1

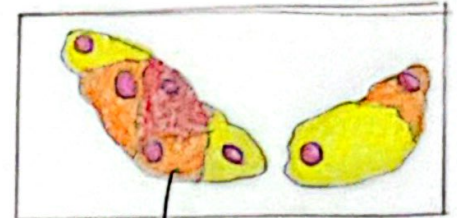

author: ZUE

date: 30/9/2025

sheet: 2

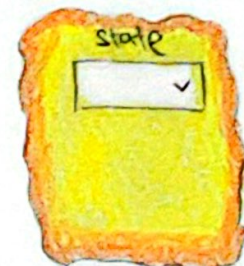

task: design an infographic poster

OPERATION

hover to see outlet count,
income and population per
state

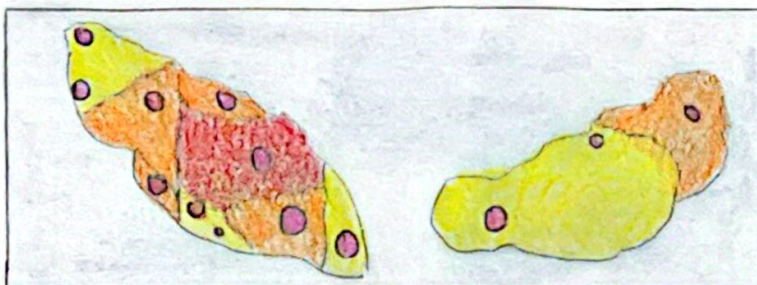

state: _____
outlet count: _____
income: _____
population: _____

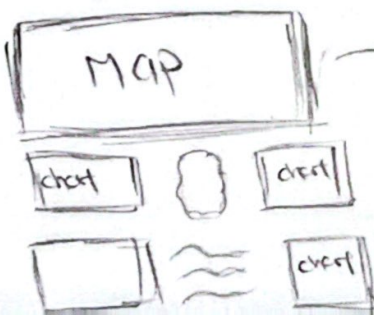

filters:
selecting a state
highlight across
all charts

FOCUS

concept: Geography Meets Lifestyle

→ the main focus is how outlet density varies across Malaysia and its connection to population, income, tourism and obesity

the map anchors the view, while the other charts provide different analytical perspectives.

DISCUSSION

Advantages

- strong for geographic and comparative analysis
- connects economic, health, and tourism aspects to outlet distributions

Disadvantages

- Four dense charts could feel overwhelming without careful layout.
- Requires consistent colour scheme across charts for readability

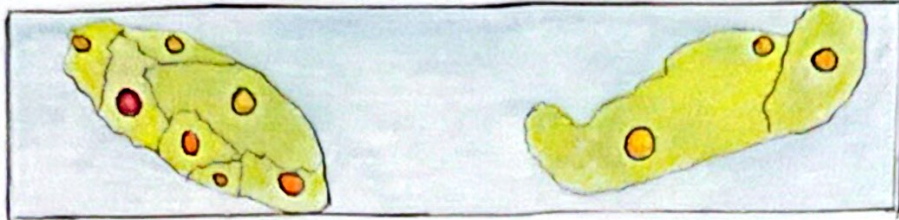

LAYOUT

McMAP MALAYSIA

Image

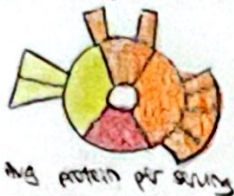

Image

policy rate by state

menu → category item → values

category → item → outlet → sales

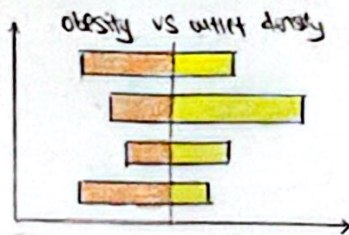

avg protein per serving

category

avg total sugar per item

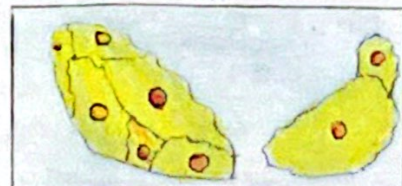

obesity vs outlet density

FOCUS

concept: from Menu to Metabolism

outlets

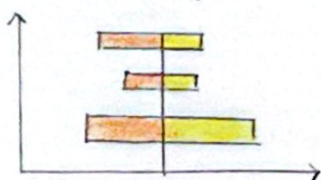

what is eaten

→ the idea is to connect where outlets are with what is eaten and health impact

→ users spend most times drilling into menu structure and comparing nutrient composition

health impact

Title: story telling 2

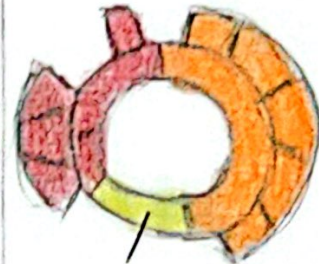

Author: Zoe

Date: 1/10/2025

sheet: 3

Task: design a scalable dashboard telling a narrative

OPERATION

roll down from category → item → outlet

click a segment (eg beverages)

After click

→ All items under beverages expand / highlight, other categories fade

→ updates based on what you clicked in the sunburst

DISCUSSION

Advantages

→ strong nutrition-health focus, easy to connect food to health outcomes

→ Diverse mix of hierarchical, categorical, and comparative views

Disadvantages

→ sunburst interpretation can be tricky for new users

→ Relies on US-based nutrition dataset as proxy

LAYOUT

Title: Story Telling 3

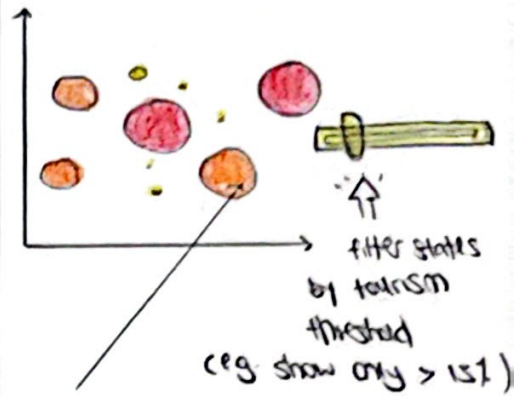

Author: Zoe

Date: 1/10/2025

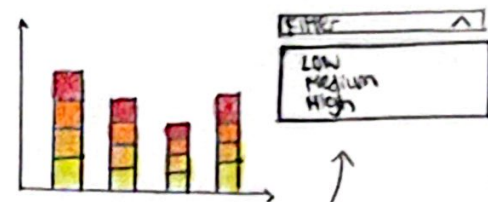

Sheet: 14

Task: Design a scrollable story-like poster

OPERATION

brushing
→ select a region of bubbles to filter states across map and bar charts

→ Switch between Income Brackets

DISCUSSION

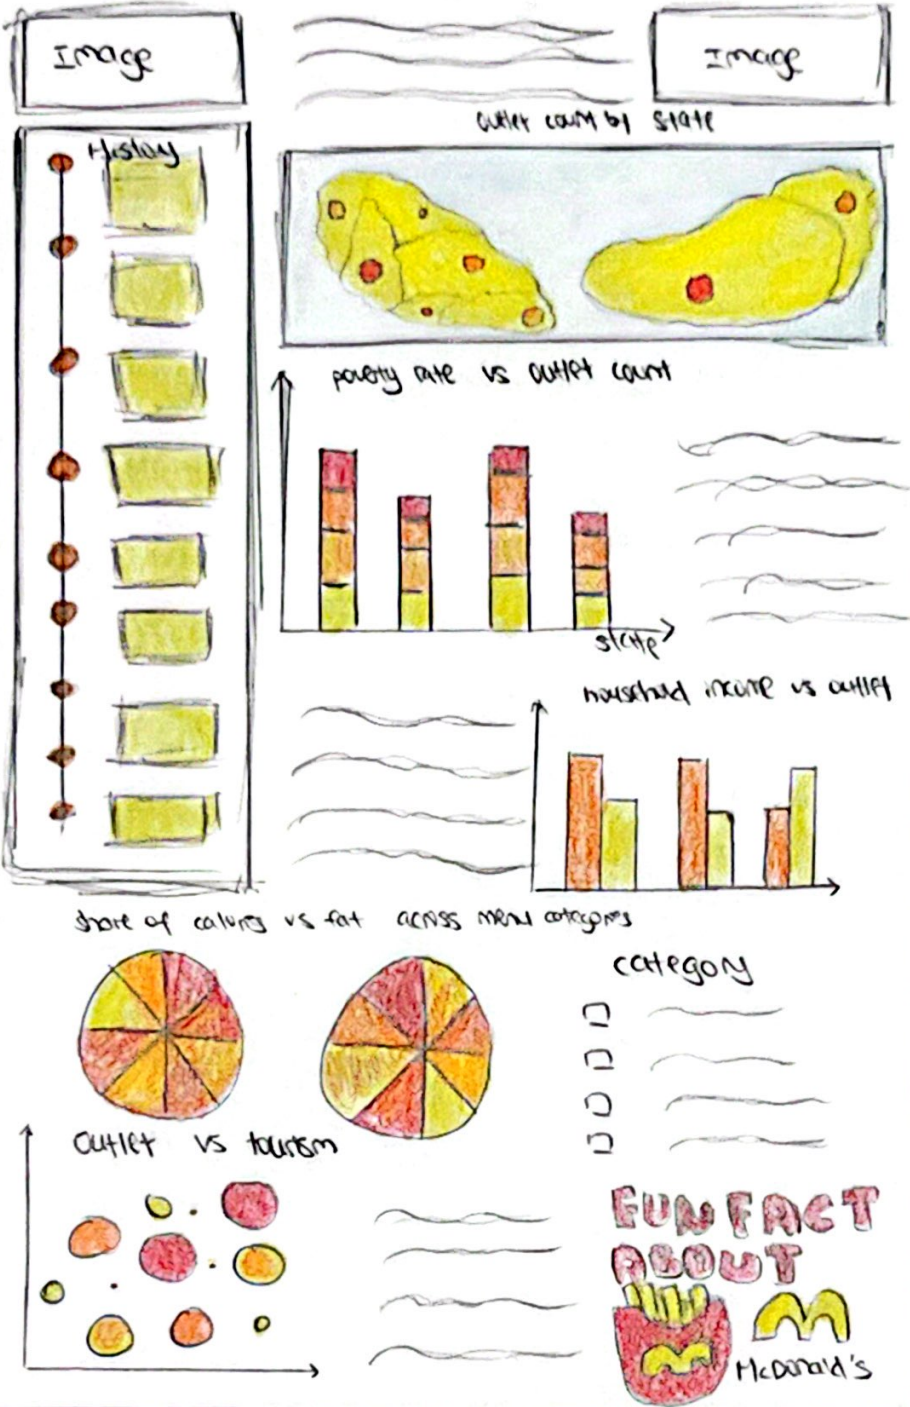

Advantages

- Strong focus on tourism and income drivers of fast food expansion
- Good mix of data types (numeric, categorical, spatial) creates balance

Disadvantages

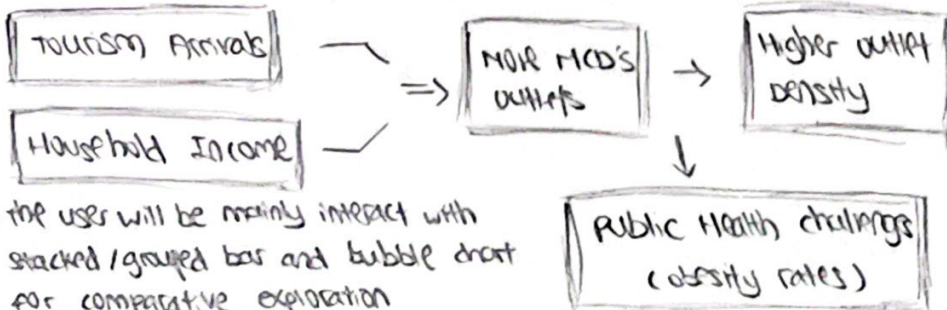

- slight split in story as the pie chart shifts from economics to nutrition
- Two bar styles side by side may feel heavy unless clearly differentiate

FOODPRINT MALAYSIA

FOCUS

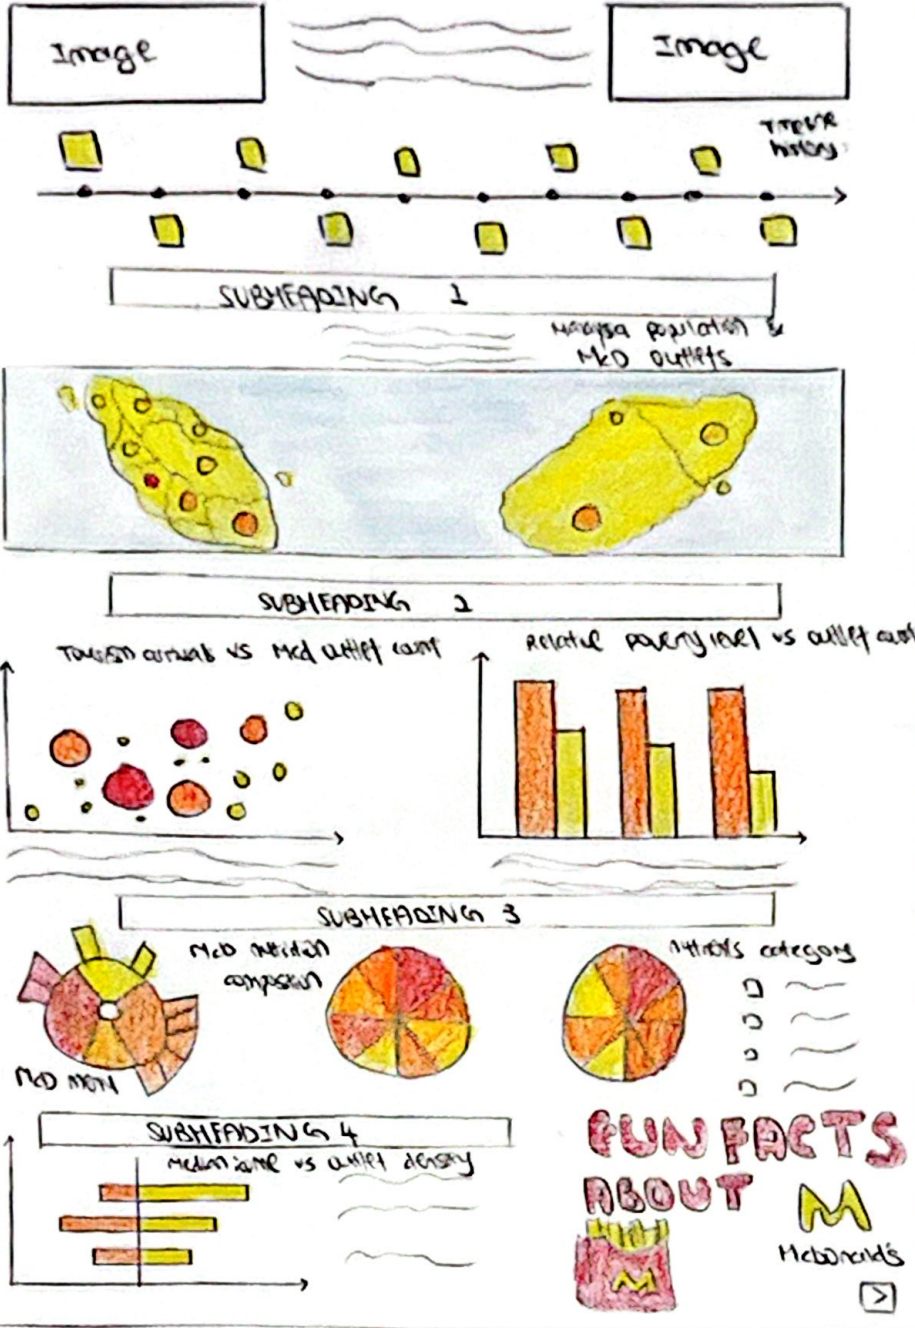

→ the focus is showing how tourism flows and household income are linked with outlet growth and whether this translates into health challenges

LAYOUT

FOODPRINT MALAYSIA

Mapping the impact of food food on economy, health, and tourism

FOCUS

→ More from
outlets → Economy → Health → Health

→ Fun Facts keep
the dashboard
engaging

① Where are outlets?

- Proportional symbol map (outlet per state)

② What drives growth?

- Bubble chart (income vs density)
- Grouped bar (tourism vs outlets)

③ What's on the menu?

- Sunburst chart (category → item)
- Pie chart (calories / fat / sodium)

④ What's the impact?

- Battery chart (obesity vs outlets)

Title: final design sheet

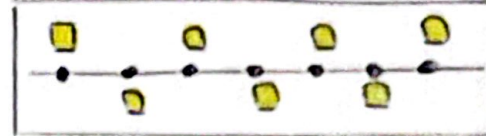

Author: Zoe

Date: 1/10/2025

Sheet: 5

Task: Design the final layout

OPERATION

scrollable timeline with fade
in and fade out effect

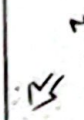

eg

Tool tip
< state >
< poverty index >
< obesity rate >

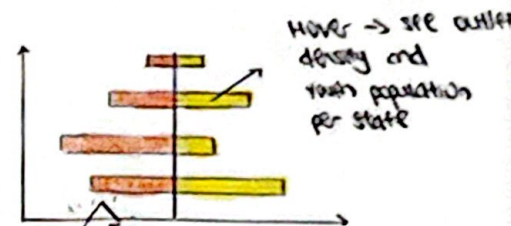

Tool tips
use for
all graphs

☐ beverage
☐ chicken
☐ sides
☐ desserts

Multi-select
filter

click state

→ highlight on map and demographic charts

DETAILS

dependencies:

- Toposon file for accurate Malaysia state map
- compatible with modern web browsers

Estimated time & Effort:

- At least 3 days to build all idioms and 3 days for final design and layout

Specific Requirement:

- Minimum display resolution: 1920 x 1080 for full dashboard visibility
- consistent colour palettes across all charts
